SECTION 1: IDENTIFICATION OF THE SUBSTANCE/MIXTURE AND OF THE COMPANY/UNDERTAKING

1.1 Product identifier

Trade name MIKAL PLUS

UFI FQR0-V08M-500M-D3W6

Product code (UVP) 05862972

1.2 Relevant identified uses of the substance or mixture and uses advised against

Use Fungicide

1.3 Details of the supplier of the safety data sheet

Supplier Bayer CropScience, S.L.

Avda. Baix Llobregat 3-5 08970 Sant Joan Despi

(Barcelona) Spain

Telephone +34(0)93 228 40 00 (during

business hours only)

Telefax +34(0)93 217 41 49

Responsible Department Email: FDS-Spain@Bayer.com

1.4 Emergency telephone no.

Emergency telephone no. National Institute of Toxicology and Forensic Sciences

+34(0)91 562 04 20 (24 h response / 7 days)

SECTION 2: HAZARDS IDENTIFICATION

2.1 Classification of the substance or mixture

Classification for Spain according to the 'Registro de Productos Fitosanitarios'

Eye irritation: Category 2

H319 Causes serious eye irritation.

Skin sensitisation: Category 1

H317 May cause an allergic skin reaction.

Carcinogenicity: Category 2

H351 Suspected of causing cancer.

Reproductive toxicity: Category 2

H361fd Suspected of damaging fertility. Suspected of damaging the unborn child.

Short-term (acute) aquatic hazard: Category 1

amended

 MIKAL PLUS

 Version 7 / E
 Revision Date: 03.09.2025

 102000013752
 Print Date: 18.09.2025

H400 Very toxic to aquatic life.

Long-term (chronic) aquatic hazard: Category 2

H411 Toxic to aquatic life with long lasting effects.

2.2 Label elements

Labelling for Spain according to the 'Registro de Productos Fitosanitarios'

Hazard label for supply/use required.

Hazardous components which must be listed on the label:

Fosetyl-Aluminium

Folpet

Cymoxanil

Signal word: Warning

Hazard statements

H317 May cause an allergic skin reaction.
 H319 Causes serious eye irritation.
 H351 Suspected of causing cancer.

H361fd Suspected of damaging fertility. Suspected of damaging the unborn child.

H410 Very toxic to aquatic life with long lasting effects.

EUH401 To avoid risks to human health and the environment, comply with the instructions for

use.

SP 1 Do not contaminate water with the product or its container (Do not clean application

equipment near surface water/Avoid contamination via drains from farmyards and

roads).

Precautionary statements

P201 Obtain special instructions before use.

P202 Do not handle until all safety precautions have been read and understood.

P260 Do not breathe dust.

P280 Wear protective gloves/protective clothing/eye protection/face protection.

P273 Avoid release to the environment.
P302 + P352 IF ON SKIN: Wash with plenty of water.

P305 + P351 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if

+ P338 present and easy to do. Continue rinsing.

P391 Collect spillage.

P501 Dispose of contents/container in accordance with local regulation.

2.3 Other hazards

No additional hazards known beside those mentioned.

Folpet: This substance is not considered to be persistent, bioaccumulative and toxic (PBT). This substance is not considered to be very persistent and very bioaccumulative (vPvB). Cymoxanil: This substance is not considered to be persistent, bioaccumulative and toxic (PBT). This substance is not considered to be very persistent and very bioaccumulative (vPvB). Fosetyl Aluminium: This substance is not considered to be persistent, bioaccumulative and toxic (PBT). This substance is not considered to be very persistent and very bioaccumulative (vPvB).

 MIKAL PLUS

 Version 7 / E
 Revision Date: 03.09.2025

 Print Date: 18.09.2025

SECTION 4: FIRST AID MEASURES

4.1 Description of first aid measures

General advice Remove contaminated clothing immediately and dispose of safely.

When symptoms develop and persist, seek medical advice.

Skin contact Wash off thoroughly with plenty of soap and water, if available with

polyethyleneglycol 400, subsequently rinse with water.

Eye contact Hold eye open and rinse slowly and gently with water for 15-20

minutes. Remove contact lenses, if present, after the first 5 minutes,

then continue rinsing eye.

Ingestion Do NOT induce vomiting. Call a physician or poison control center

immediately. Rinse out mouth and give water in small sips to drink.

Keep patient warm and at rest.

4.2 Most important symptoms and effects, both acute and delayed

Symptoms The following symptoms may occur:, Skin, eye and mucous membrane

irritation

4.3 Indication of any immediate medical attention and special treatment needed

Treatment There is no specific antidote. Treat symptomatically. In case of

ingestion gastric lavage should be considered in cases of significant ingestions only within the first 2 hours. However, the application of activated charcoal and sodium sulphate is always advisable.

SECTION 5: FIREFIGHTING MEASURES

5.1 Extinguishing media

Suitable Use water spray, alcohol-resistant foam, dry chemical or carbon

dioxide.

Unsuitable High volume water jet

5.2 Special hazards arising

from the substance or mixture

Dangerous gases are evolved in the event of a fire., In the event of fire the following may be released:, Carbon monoxide (CO), Nitrogen

oxides (NOx), Oxides of phosphorus, Sulphur oxides, Hydrogen

chloride (HCI)

5.3 Advice for firefighters

Special protective

equipment for firefighters

In the event of fire and/or explosion do not breathe fumes. Wear self-

contained breathing apparatus and protective suit.

Further information Remove product from areas of fire, or otherwise cool containers with

water in order to avoid pressure being built up due to heat. Contain the spread of the fire-fighting media. Do not allow run-off from fire fighting

to enter drains or water courses.

amended

SECTION 6: ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions, protective equipment and emergency procedures

Precautions Avoid contact with spilled product or contaminated surfaces. Use

personal protective equipment. Keep unauthorized people away.

6.2 Environmental

precautions

Do not allow to get into surface water, drains and ground water.

6.3 Methods and materials for containment and cleaning up

Methods for cleaning upSweep up or vacuum up spillage and collect in suitable container for

disposal. Collect and transfer the product into a properly labelled and tightly closed container. Clean contaminated floors and objects

thoroughly, observing environmental regulations.

Additional advice Check also for any local site procedures.

6.4 Reference to other

sections

Information regarding safe handling, see section 7.

Information regarding personal protective equipment, see section 8.

Information regarding waste disposal, see section 13.

SECTION 7: HANDLING AND STORAGE

7.1 Precautions for safe handling

Advice on safe handling Provide for appropriate exhaust ventilation and dust collection at

machinery. Avoid dust formation.

Advice on protection against fire and explosion

Keep away from heat and sources of ignition.

Hygiene measures Avoid contact with skin, eyes and clothing. Keep working clothes

separately. Wash hands before breaks and immediately after handling the product. Remove soiled clothing immediately and clean thoroughly

before using again. When using, do not eat, drink or smoke.

7.2 Conditions for safe storage, including any incompatibilities

Requirements for storage areas and containers

Store in original container. Store in a place accessible by authorized persons only. Keep containers tightly closed in a dry, cool and well-

ventilated place. Keep away from direct sunlight.

Advice on common storage Keep away from food, drink and animal feedingstuffs.

Suitable materials Aluminium composite film (min. 0,007 mm Aluminium)

7.3 Specific end use(s) Refer to the label and/or leaflet.

SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

8.1 Control parameters

Fosetyl-Aluminium	39148-24-8	5 mg/m3	OES BCS*
		(TWA)	

^{*}OES BCS: Internal Bayer AG, Crop Science Division "Occupational Exposure Standard"

8.2 Exposure controls

Personal protective equipment

In normal use and handling conditions please refer to the label and/or leaflet. In all other cases the following recommendations would apply.

Respiratory protection Wear respirator conforming to EN136P3, EN14594 or EN14593-1

(continuous flow).

Respiratory protection should only be used to control residual risk of short duration activities, when all reasonably practicable steps have been taken to reduce exposure at source e.g. containment and/or local extract ventilation. Always follow respirator manufacturer's

instructions regarding wearing and maintenance.

Hand protection Please observe the instructions regarding permeability and

breakthrough time which are provided by the supplier of the gloves. Also take into consideration the specific local conditions under which the product is used, such as the danger of cuts, abrasion, and the

contact time.

Wash gloves when contaminated. Dispose of when contaminated inside, when perforated or when contamination on the outside cannot be removed. Wash hands frequently and always before eating,

drinking, smoking or using the toilet.

Material Nitrile rubber
Rate of permeability > 480 min
Glove thickness > 0,4 mm
Protective index Class 6

Directive Protective gloves complying with EN

374.

Eye protection Wear goggles (conforming to EN166, Field of Use = 5 or equivalent).

Skin and body protection Wear standard coveralls and Category 3 Type 5 suit.

If there is a risk of significant exposure, consider a higher protective

type suit.

Wear two layers of clothing wherever possible. Polyester/cotton or cotton overalls should be worn under chemical protection suit and

should be professionally laundered frequently.

SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES

properties

Further safety related physical-chemical data are not known.

SECTION 10: STABILITY AND REACTIVITY

10.1 Reactivity Stable under recommended storage conditions.

Self heating May self heat in case of storage in mass at high temperature.

10.2 Chemical stability Stable under recommended storage conditions.

10.3 Possibility of No hazardous reactions when stored and handled according to

hazardous reactions prescribed instructions.

10.4 Conditions to avoid Extremes of temperature and direct sunlight.

10.5 Incompatible materials Store only in the original container.

decomposition products

10.6 Hazardous

No decomposition products expected under normal conditions of use.

SECTION 11: TOXICOLOGICAL INFORMATION

11.1 Information on hazard classes as defined in regulation (EC) No 1272/2008

Acute oral toxicity LD50 (Rat) > 2.000 mg/kg

Acute inhalation toxicity

Not relevant because of low dust formation.

Acute dermal toxicity LD50 (Rat) > 2.000 mg/kgSkin corrosion/irritation No skin irritation (Rabbit) Serious eye damage/eye Irritating to eyes. (Rabbit)

irritation

Respiratory or skin Skin: Non-sensitizing. (Guinea pig) sensitisation OECD Test Guideline 406, Buehler test

Assessment STOT Specific target organ toxicity - single exposure

Folpet: Based on available data, the classification criteria are not met. Cymoxanil: Based on available data, the classification criteria are not met.

Fosetyl Aluminium: Based on available data, the classification criteria are not met.

Assessment STOT Specific target organ toxicity - repeated exposure

Folpet did not cause specific target organ toxicity in experimental animal studies.

Cymoxanil caused specific target organ toxicity in experimental animal studies in the following organ(s): Blood, thymus, Eyes. Cymoxanil: May cause damage to organs (Blood, thymus, Eyes) through prolonged or repeated exposure.

Fosetyl Aluminium did not cause specific target organ toxicity in experimental animal studies.

Assessment mutagenicity

amended

 MIKAL PLUS

 Version 7 / E
 Revision Date: 03.09.2025

 102000013752
 Print Date: 18.09.2025

Folpet was not mutagenic or genotoxic based on the overall weight of evidence in a battery of in vitro and in vivo tests.

Cymoxanil was not mutagenic or genotoxic based on the overall weight of evidence in a battery of in vitro and in vivo tests.

Fosetyl Aluminium was not mutagenic or genotoxic in a battery of in vitro and in vivo tests.

Assessment carcinogenicity

Folpet caused at high dose levels an increased incidence of tumours in mice in the following organ(s): Duodenum. The mechanism that triggers tumours in rodents is not relevant for the low exposures encountered under normal use conditions. Folpet was not carcinogenic in a lifetime feeding study in rats. Cymoxanil was not carcinogenic in lifetime feeding studies in rats and mice.

Fosetyl Aluminium was not carcinogenic in lifetime feeding studies in rats and mice.

Assessment toxicity to reproduction

Folpet did not cause reproductive toxicity in a two-generation study in rats.

Cymoxanil caused reduced sperm count in male rats at high doses, a reduced litter size and a reduced pup weight. Cymoxanil: Suspected of damaging fertility.

Fosetyl Aluminium did not cause reproductive toxicity in a two-generation study in rats.

Assessment developmental toxicity

Folpet did not cause developmental toxicity in rats and rabbits.

Cymoxanil caused an increased incidence of non-specific malformations, an increased incidence of variations. Cymoxanil suspected of damaging the unborn child.

Fosetyl Aluminium did not cause developmental toxicity in rats and rabbits.

Aspiration hazard

Based on available data, the classification criteria are not met.

11.2 Information on other hazards

Endocrine disrupting properties

Assessment The substance/mixture does not contain components considered to have

endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission

Regulation (EU) 2018/605 at levels of 0.1% or higher.

SECTION 12: ECOLOGICAL INFORMATION

12.1 Toxicity

Toxicity to fish LC50 (Oncorhynchus mykiss (rainbow trout)) 0,304 mg/l

Exposure time: 96 h

Chronic toxicity to fish Oncorhynchus mykiss (rainbow trout)

NOEC: 0,044 mg/l Exposure time: 90 d

The value mentioned relates to the active ingredient cymoxanil.

Toxicity to aquatic

EC50 (Daphnia magna (Water flea)) 3,9 mg/l

invertebrates Exposure time: 48 h

Toxicity to aquatic plants EC50 (Raphidocelis subcapitata (freshwater green alga)) 12.6 mg/l

amended

 MIKAL PLUS

 Version 7 / E
 Revision Date: 03.09.2025

 102000013752
 Print Date: 18.09.2025

Growth rate: Exposure time: 72 h

12.2 Persistence and degradability

Biodegradability Folpet:

rapidly biodegradable

Cymoxanil:

Not rapidly biodegradable Fosetyl Aluminium: rapidly biodegradable

Koc Folpet: Koc: 304

Cymoxanil: Koc: 14,4 - 107,8 Fosetyl Aluminium: Koc: 0,1

12.3 Bioaccumulative potential

Bioaccumulation Folpet: Bioconcentration factor (BCF) 56

Does not bioaccumulate.

Cymoxanil:

Does not bioaccumulate. Fosetyl Aluminium: Does not bioaccumulate.

12.4 Mobility in soil

Mobility in soil Folpet: Moderately mobile in soils

Cymoxanil: criterion of mobility not fulfilled

Fosetyl Aluminium: criterion of mobility not fulfilled

12.5 Results of PBT and vPvB assessment

PBT and vPvB assessment Folpet: This substance is not considered to be persistent,

bioaccumulative and toxic (PBT). This substance is not considered to be

very persistent and very bioaccumulative (vPvB).

Cymoxanil: This substance is not considered to be persistent,

bioaccumulative and toxic (PBT). This substance is not considered to be

very persistent and very bioaccumulative (vPvB).

Fosetyl Aluminium: This substance is not considered to be persistent, bioaccumulative and toxic (PBT). This substance is not considered to be

very persistent and very bioaccumulative (vPvB).

12.6 Endocrine disrupting properties

Assessment The substance/mixture does not contain components considered to have

endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission

Regulation (EU) 2018/605 at levels of 0.1% or higher.

12.7 Other adverse effects

Additional ecological

information

No other effects to be mentioned.

SECTION 13: DISPOSAL CONSIDERATIONS

13.1 Waste treatment methods

amended

 MIKAL PLUS

 Version 7 / E
 Revision Date: 03.09.2025

 102000013752
 Print Date: 18.09.2025

Product In accordance with current regulations and, if necessary, after

consultation with the site operator and/or with the responsible authority, the product may be taken to a waste disposal site or incineration plant.

Contaminated packaging Empty remaining contents.

Do not re-use empty containers.

Emptied and rinsed containers have to be taken to SIGFITO (Sistema Integrado de Gestión de envases FITOsanitarios), the collection system

for packaging materials in agriculture.

Waste key for the unused

product

The information contained within this Safety Data Sheet is in accordance with the guidelines established by Regulation (EU) 1907/2006 and Regulation (EU) 2020/878 amending Regulation (EU) No 1907/2006 and any subsequent amendments. This data sheet complements the user's instructions, but does not replace them. The information it contains is based on the knowledge available about the product concerned at the time it was compiled. Users are further reminded of the possible risks of using a product for purposes other than those for which it was intended. The required information complies with current EEC legislation. Addressees are requested to observe any additional national requirements.

Reason for Revision: The following sections have been revised: Section 3: Composition /

Information on Ingredients. Section 11: Toxicological information on STOT (Specific Target Organ Toxicity) and CMR (Carcinogenic,

Mutagenic and toxic to Reproduction).

Changes since the last version are highlighted in the margin. This version replaces all previous versions.
